**Description of Duties:**

This is a professional staff position responsible for maintaining the currency of long-range plans for the construction and renovation of educational facilities as required by the New York State Education Department. Duties involve planning and making detailed surveys of school facilities' needs to ensure the development of effective and economical plans. The employee reports directly to, and works under the general supervision of the Director of Educational Facilities or other higher-level staff member.

**Scope of Examination:**

The **written, multiple-choice test** will cover knowledge, skills and/or abilities in such areas as:

1. Architectural drawings, including plans, elevations, sections, details and estimates

These questions test for the ability to read, analyze, and perform computations based on technical drawings of various types of buildings and related facilities. Knowledge of basic estimating techniques and how building construction materials are utilized on specified projects is required.

2. Principles of architectural design and methods of conserving energy in buildings

These questions test for knowledge of the techniques and standards involved in the professional architecture field and the proper construction and renovation procedures to use to improve the energy efficiency of buildings and related facilities.

3. Knowledge and application of codes related to building design, construction and renovation

These questions are related to codes found in the current versions of the New York State Uniform Fire Prevention and Building Construction Code, the National Fire Protection Association Life Safety Code (NFPA 101) and American National Standards Institute (ICC/ANSI A117.1).

4. Facilities space planning, analysis and related codes

These questions test for knowledge of the principles and practices involved in space planning and analysis for buildings and related facilities, to perform computations based on information given in written physical descriptions of various facilities, and to identify applicable provisions of the Building and Fire Codes of New York State and the National Fire Protection Association Code (NFPA 101).
