Description of Duties:

This position, located at the Greater Rochester International Airport, is responsible for the protection of life and property by responding to medical, structural and aircraft emergencies. Duties involve performing hazardous work around operating aircraft including controlling and extinguishing aircraft and structural fires, operation and maintenance of specialized equipment for firefighting, and application of air/crash/rescue techniques. The employee must be physically capable of performing difficult tasks in a high degree of heat, stress and noise and work rotating shifts. The employee reports directly to, and works under the general supervision of the Fire Chief – Airport or Fire Captain – Airport while exercising considerable independent judgment when responding to emergency situations.

Scope of Examination:

The **written, multiple-choice test** will cover knowledge, skills and/or abilities in such areas as:

1. Fire prevention, fire inspections, and fire hazards

These questions test for a knowledge of the methods, principles, practices, and equipment of fire prevention, conducting fire inspections, and dealing with fire hazards. The questions cover such areas as the following: fire prevention campaigns; automatic and other extinguishment systems; alarms; dealing with building owners and managers; characteristics of combustible materials; recognizing proper and improper practices related to fire prevention; and codes and regulations related to fire prevention.

2. Preparing written material

These questions test for the ability to present information clearly and accurately, and to organize paragraphs logically and comprehensibly. For some questions, you will be given information in two or three sentences followed by four restatements of the information. You must then choose the best version. For other questions, you will be given paragraphs with their sentences out of order. You must then choose, from four suggestions, the best order for the sentences.

3. Understanding and interpreting fire codes

These questions test for the ability to comprehend written material related to fire prevention and inspection. You will be provided with a brief reading passage. You must then select the most appropriate statement relating to the passage on the basis of whether it:

- a. accurately paraphrases portions of the passage; or
- b. adequately summarizes the passage; or
- c. presents an inference that can reasonably be drawn from the passage.

The reading passages are drawn from existing New York State and national codes, regulations, and standards. Knowledge of the subject matter contained in the reading passages is generally not related to answering the questions successfully because all of the information needed can be found in the passages.

Most civil service written tests do not require the use of a calculator or slide rule. However, the use of calculators is **ALLOWED** for this exam.
