Duties involve the creation and management of user accounts across all applications, ensuring proper system back-up procedures and security measures are in place, and light scripting and programming. The position acts as a problem solver and is expected to diagnose and correct problems quickly and accurately. The Systems Administrator will also assist with managing the hardware configurations and changes to standard models and configuration. This position differs from Senior Systems Administrator in that it's an entry-level position, performing less complex tasks, is not responsible for the oversight or supervision of staff, and performs duties with less independence. The examination will consist of a rated evaluation of training and experience test.

Rated Evaluation of Training and Experience:
All candidates who meet the minimum qualifications will be sent a letter directing them to a web-site to complete a questionnaire that asks for specific facts about your information technology education (formal degrees, IT-related training courses, certifications) and experience. After the names of residents have been exhausted the Commission must then certify in regular rank order the names of non-residents on the list.
